```
select a1.player_id, a1.event_date, sum(a2.games_played) as games_played_so_far
from activity as a1
inner join activity as a2
on a1.event_date >= a2.event_date
and a1.player_id = a2.player_id
group by a1.player_id, a1.event_date
```

```
SELECT player_id,
to_char(event_date,'YYYY-MM-DD') event_date,
sum(games_played) over(partition BY player_id order by event_date nulls last) games_played_so_far
FROM Activity;
```
