❤️ Add to List

🔗 Share

SQL Schema >

The `Numbers` table keeps the value of number and its frequency.

Number	Frequency
0	7
1	1
2	3
3	1

In this table, the numbers are 0, 0, 0, 0, 0, 0, 0, 1, 2, 2, 2, 3, so the median is $(0 + 0) / 2 = 0$.

median
0.0000

Write a query to find the median of all numbers and name the result as `median`.
