

## 1102. Path With Maximum Minimum Value

Medium 397 47 Add to List Share

Given a matrix of integers `A` with `R` rows and `C` columns, find the **maximum** score of a path starting at `[0,0]` and ending at `[R-1,C-1]`.

The **score** of a path is the **minimum** value in that path. For example, the value of the path `8 → 4 → 5 → 9` is 4.

A *path* moves some number of times from one visited cell to any neighbouring unvisited cell in one of the 4 cardinal directions (north, east, west, south).

### Example 1:

5	4	5
1	2	6
7	4	6

Input: `[[5,4,5],[1,2,6],[7,4,6]]`

Output: 4

Explanation:

The path with the maximum score is highlighted in yellow.

### Example 2:

2	2	1	2	2	2
1	2	2	2	1	2

Input: `[[2,2,1,2,2,2],[1,2,2,2,1,2]]`

Output: 2

### Example 3:

3	4	6	3	4
0	2	1	1	7
8	8	3	2	7
3	2	4	9	8
4	1	2	0	0
4	6	5	4	3

Input: `[[3,4,6,3,4],[0,2,1,1,7],[8,8,3,2,7],[3,2,4,9,8],[4,1,2,0,0],[4,6,5,4,3]]`

Output: 3

### Note:

- $1 \leq R, C \leq 100$
- $0 \leq A[i][j] \leq 10^9$
