SQL Schema >

Table: ActorDirector

```
+-----+-----+
| Column Name | Type  |
+-----+-----+
| actor_id    | int   |
| director_id | int   |
| timestamp   | int   |
+-----+-----+
timestamp is the primary key column for this table.
```

Write a SQL query for a report that provides the pairs (actor_id, director_id) where the actor have cooperated with the director at least 3 times.

Example:

ActorDirector table:

```
+-----+-----+-----+
| actor_id | director_id | timestamp |
+-----+-----+-----+
| 1        | 1          | 0         |
| 1        | 1          | 1         |
| 1        | 1          | 2         |
| 1        | 2          | 3         |
| 1        | 2          | 4         |
| 2        | 1          | 5         |
| 2        | 1          | 6         |
+-----+-----+-----+
```

Result table:

```
+-----+-----+
| actor_id | director_id |
+-----+-----+
| 1        | 1          |
+-----+-----+
```

The only pair is (1, 1) where they cooperated exactly 3 times.
