```
select activity_date as day, count(distinct user_id) as active_users
from Activity
where datediff('2019-07-27', activity_date) < 30
group by activity_date
```

Would need to be:

```
SELECT
    IFNULL(COUNT(DISTINCT user_id), 0) as active_users,
    activity_date as day
FROM Activity
where
    datediff('2019-07-27', activity_date) < 30
    and
    activity_date <= '2019-07-27'
GROUP BY activity_date
```
